PROFESSIONAL SUMMARY

A resourceful Continuous Improvement Engineer with 5 years of experience in strategy implementation, customer satisfaction, and leadership. Experienced in performing workplace audits (Gemba Walk, 5S & Safety Walk). Process mapping, value stream mapping, and identifying inefficiencies in productivity with a particular focus on layouts and sequencing. Deploying appropriate methodologies to problem-solving and support teams to solve problems, ensuring the escalation process. Supporting the business in establishing "best practices". Implementing standard work, visual factory, and error proofing (Poka-yoke). Undertaking continuous training and development to job responsibilities.

EXPERIENCE

CONTINUOUS IMPROVEMENT ENGINEER

LEAR Corporation Trim Plant Ungheni, Moldova | 10/2018 – 10/2022

Participate in and contribute to lean improvement activities, looking at safety, quality, delivery, productivity, cost, and efficiency, delivering benefits to support customer satisfaction.

Responsibilities as Continuous Improvement Engineer:

- Applying Lean Manufacturing & Six Sigma tools and methodology throughout the manufacturing facility and processes
- Collecting & Analysing current production data
- Determine the best options for process improvement tactics
- Drive the standardisation of processes and implementation of metrics and best practices
- Train employees on new manufacturing practices
- Analyse output under new practices
- Promote quality, efficiency, and safety in the plant
- Maintain KPI targets in line with business strategy
- Assist in setting annual operational targets and drive improvements to achieve those targets
